EDUCATION

Southern University of Science and Technology

Bachelor in Data Science

Shenzhen, China

Sept. 2023 – Present

- Cumulative GPA: 3.84/4.00
- Relevant Coursework: Machine Learning, Data Structures and Algorithms, Mathematical Statistics, Database Systems, Deep Learning, Natural Language Processing.

University of California, San Diego

Visiting Student

San Diego, US

Sept. 2025 - Dec. 2025

RESEARCH EXPERIENCE

Multi-Agent AI Smart Sports Analysis Platform for Middle and Long-Distance Running

Algorithm and Marketing

Shenzhen, China

Oct. 2025 - Present

- Developed a multi-agent system (Summarizer & Planner) that uses LLMs to analyze health data and create personalized workout plans.
- Built the data collection system for a large dataset (“ParroTao”) with 42,576 sessions. Solved data format differences by connecting to Garmin and Coros APIs, ensuring reliable data for the LSTM-based heart rate models.
- Worked with university track teams to identify professional athlete needs, then designed the platform’s analysis tools based on their requirements.

Sensor-Based Tennis Movement Evaluation System

Data Collection and Analysis

Shenzhen, China

Nov. 2024 – Sept. 2025

- Developed an embedded sensors system in the racket to track swings, using Random Forest (RF) and Support Vector Machines (SVM) to analyze movement, evaluate performance, and provide feedback. Currently achieves overall 83% accuracy in stroke detection.
- A school-level project under “Climbing Plan” of Guangdong Province, China.

HONORS AND AWARDS

Contemporary Undergraduate Mathematical Contest in Modeling, Guangdong

Second Prize

Sept. 2025

Merit Student Scholarship of Southern University of Science and Technology

First Class Scholarship

Nov. 2024

SKILLS

- Languages: English - fluent, Chinese - native.
- Python(Pytorch, Scikit-learn, Pandas, Matplotlib, etc.), Java, C++, MySQL, Git, Linux, LaTeX, Typst, Data Structure and Algorithms, Deep Learning, LLM
